PCA Architects

PROJECT DESCRIPTION

The project consisted of the remodeling of an existing historically significant auditorium on the San Diego State University Campus. The renovation converted the space to a smart classroom with significant upgrades to the audio and video capacity of the room. The project was constructed through the short summer window and included the procurement and installation of all new stadium seating within the space.

ADDED VALUE

Our preconstruction team was able to work with the client and University in the early planning stages of the project to provide immediate cost information, enabling the client to make decisions on the project in a more timely manner.

SERVICES PROVIDED

Our team provided construction project management services including estimating, value engineering, contract execution and management, change management, construction oversight, closeout and notice of completion filing with the County of San Diego
